

Greater Fox Cities Area Habitat for Humanity 2018 Attic Insulation Bid Specs

This RFP is for attic blown insulation. All homes are new construction and homes will be ready, per schedule, with proper vents and blockers installed by others. All homes have a ceiling area of less than 1000 square foot to be blown with fiberglass to a value of not less than R-50.

All homes have at least two 20 amp power circuits available by the time insulation is required.

All insulation jobs will be subject to Energy Star 3.0 and the Focus on Energy New Homes Program inspection after completion.

All contractors will comply with Habitat's recycling procedures. A copy of these procedures is included with this RFP.

Please ensure that prices quoted will be good for the entire 2018 building season. All bids must be back to Habitat by **January 20, 2018** to be considered. All contractors must provide insurance papers with Habitat for Humanity listed as a certificate holder upon acceptance of proposal.
