

Chapter 22 – Finishing the Shed

Finishing the shed	<ol style="list-style-type: none">1. Installing Sub-Fascia:<ol style="list-style-type: none">a. Measure from the truss peak to the end of the truss tails on both sides of a gable end truss.b. Cut two pieces from a 2x6x12' to cover the truss.c. Install over gable end sheathing with top of sub-fascia flush with the top of truss chord.d. Nail each right and left side w/ five pairs of 3¼" Paslode'se. Repeat on opposite gable end2. Measure eave length from outside-to-outside surfaces of front/back gable end sub-fascia.<ol style="list-style-type: none">a. Cut a 2x6x10' to this length. Install crown up, tight to the roof sheathing, outside corners flush.b. Nail w/two 3¼" Paslode's into each truss and gable end sub-fasciac. Repeat on the opposite eave side3. Installing gable end corners:<ol style="list-style-type: none">a. Use a framing square to mark the bottom edge of the eave sub-fascia on each eave wallb. Measure and record the distance from the inside surface of the eave end sub-fascia to the wall at each corner and cut four scrap pieces of 2x6 to these lengthsc. Mark an angle cut per Fig. 22-10 on each piece. Also cut four scrap 2x4's to 6"-8" long for end corner support block piecesd. Install at each corner, flush to the chalk line and bottom of eave sub-fascia. Nail two angled 3¼" Paslode's through the end corner into the gable end sub-fascia, and two through the eave end sub-fascia into the gable end cornere. Place a support block on the wall behind the end corner. Nail block to wall framing w/ two 3¼" Paslode's. Nail gable end corner to support block w/ two 3¼" Paslode's.f. Repeat at all corners4. 12. Completing the shed:<ol style="list-style-type: none">a. Cut four 2" wide strips of ½" OSB to cover gable end sub-fascia. Nail w/ 2⅜" Paslode's every 6"5. 13. See section 9.3 for installing shed door6. 14. See section 11.3 for siding the shed
